Parking & Access Control

A Card-Free and Hands-Free System that Keeps Vehicles Moving

The market leader in automatic vehicle identification (AVI) solutions, TransCore uses time-proven radio frequency identification (RFID) technology to increase security, enhance operational efficiencies within parking facilities, and improve the overall experience for employees and guests.

Green parking is just a step away.

Automatic Access

Employees can proceed quickly through entries and exits with limited holdups or distractions. This improves traffic flow during peak times at the beginning and end of the work day.

Convenience

Employees no longer need to fumble for an ID card, punch a keypad or wait in line for others ahead of them to gain access. In addition to minimizing hassles, wait time and distractions, windshield-mounted or vehicle-mounted tags also mean no lost cards.

Integration

Integration into existing access control and facility management systems is easy. TransCore's AVI components interface seamlessly with existing back-office operations; and company parking managers can integrate the RFID data into standard access control and security systems.

Security

TransCore's hands-free technology increases personal security by eliminating the need to roll down the window to swipe a card pull a ticket to gain access.

Sustainability

Using wireless RFID technology significantly decreases carbon emissions by reducing idle times an estimated 25-30 percent.

TRANSCORE
Trusted Transportation Solutions

Interoperability

TransCore's multiprotocol readers can be programmed for use wherever tags are read. The same tag used on toll roads may be used in a variety of different applications, including access to corporate campuses.

Technology

As the transportation RFID pioneer, TransCore has deployed an average of more than 7 million tags and 4 million readers per year since 2010. TransCore's time-tested AVI solutions improve the way parking and facility managers get the most out of scarce parking real estate, while improving security and enhancing customer satisfaction.

TransCore's parking and access products may be purchased through an international network of authorized dealers and distributors trained and supported by TransCore.

Environmental Benefits

TransCore's Battery-Free Tags

- ▶ Require less petroleum-based raw material to manufacture
- ▶ Reduce transportation and shipping requirements
- ▶ Eliminate cost to produce, store and dispose of batteries

RFID-Enabled Hang Tag

- ▶ Toledo Ticket offering (powered by TransCore)
- ▶ Gate access
- ▶ Visual enforcement
- ▶ Special event programs

eGo® Plus Windshield Sticker Tag

- ▶ Thin, flexible format
- ▶ Non-battery
