Gated Communities
Parking & Access Control

A Card-Free and Hands-Free System to Manage your Gated Community

Communities install controlled access systems for a variety of reasons, but none as important as the security of its residents and property. While gated, controlled access provides management and residents with peace of mind, older systems were often cumbersome, slow and inconvenient. With TransCore's access tag mounted to the windshield, residents and members simply drive up to the gate, which then opens automatically. The card-free, hands-free system also keeps unwelcome people from entering.

The market leader in automatic vehicle identification (AVI) solutions, TransCore uses time-proven radio frequency identification (RFID) technology to increase security, reduce delays at the gate, and improve the overall experience for residents, members and approved guests.

Green parking is just a step away.

Automatic Access

Reisdents can proceed quickly through gated entries and exits with limited holdups. This improves traffic flow during peak times and reduces harmful vehicle emissions.

Convenience

Residents and members no longer need to fumble for an ID card or wait in line for others ahead of them to gain access. In addition to minimizing hassles, wait time and distractions, windshield-mounted or vehicle-mounted tags also mean no lost cards.

Security

TransCore's hands-free technology increases personal security by eliminating the need to roll down the window to swipe a card or punch a keypad to gain access.

Sustainability

Using wireless RFID technology significantly decreases carbon emissions by reducing idle times an estimated 25-30 percent.

TRANSCORE
Trusted Transportation Solutions

Interoperability

TransCore's multiprotocol readers can be programmed for use wherever tags are read. The same tag used on toll roads may be used in a variety of different applications, including access to private communities.

Technology

As the transportation RFID pioneer, TransCore has deployed an average of more than 7 million tags and 4 million readers per year since 2010. TransCore's time-tested AVI solutions improve the way parking and facility managers get the most out of scarce parking real estate, while improving security and enhancing customer satisfaction.

TransCore's parking and access products may be purchased through an international network of authorized dealers and distributors trained and supported by TransCore.

Environmental Benefits

TransCore's Battery-Free Tags

▶ Require less petroleum-based raw material to manufacture

▶ Reduce transportation and shipping requirements

▶ Eliminate cost to produce, store and dispose of batteries

RFID-Enabled Hang Tag

▶ Toledo Ticket offering (poweredby TransCore)

▶ Gate access

▶ Visual enforcement

eGo® Headlamp Sticker Tag

▶ Multiprotocol: Super eGo and ATA

▶ Wiegand programming available

▶ Flexible, transparent sticker format

▶ Easy-peel release liner for quick installation

▶ Non-battery

Encompass® 4 Reader

▶ Portable and cost effective

▶ Users can immediately view tag data
